

INTRODUCTION TO BLUEPRINT READING

Introduction to Blueprint Reading!

A well-trained and motivated workforce is critical to the success of any industry. Unfortunately, training for many of our regional building and construction trades contractors is in short supply. TCC and the Builders & Contractors Exchange plan to help address this skill gap by partnering to deliver relevant training beginning in early 2018. Course information:

- Convenient half day class
- Training delivered at Builders & Contractors Exchange
- Basic principles covered include drawing elevations, sections, scaling, dimensioning, isometric views, orthographic projection, schematic drawing, and drafting terminology
- Content can be tailored to a specific trade upon request
- Cost - \$150 per student

This is a great opportunity to improve the quality of your workforce and increase productivity on the jobsite.

Improve job performance and prepare high-potential employees for increased responsibility and leadership.

Benefits include:

- Improve work quality by better preparing your employees for the jobsite
- Increase employee motivation by offering opportunities to learn and grow
- Establish a strategy for developing your future supervisors
